Morningstar's quarterly KiwiSaver Survey is designed to help New Zealand investors assess the past performance and other key characteristics of their KiwiSaver superannuation options. The accompanying tables show KiwiSaver fund returns for the three months and one, three, five, and 10 years to June 30, 2023.

Key Takeaways

- KiwiSaver assets increased, ending the quarter at NZD 97.5 billion.
- Average multisector category returns for the June quarter ranged from 1.2% for the conservative category to 5.5% for the aggressive category.

01**Market Commentary**

Throughout the year, the global economic landscape has experienced notable changes and uncertainties. Factors such as inflationary pressures and the actions taken by central banks have played a crucial role in shaping the economic outlook. While inflation rates continue to fluctuate across various regions, there is an expectation that they will gradually ease as aggregate demands stabilizes. Nevertheless, the short-term economic outlook remains uncertain due to numerous economic and financial risks, geopolitical tensions, and environment challenges that persist.

Domestically, the Reserve Bank of New Zealand increased the official cash rate by 25 basis points to 5.50%¹ in its meeting on May 24, 2023. Annual inflation fell to 6.0% in the second quarter, food prices and housing costs, including rent and property prices, are still the main contributors to annual inflation.

The New Zealand equity market showed a slightly positive performance over the June quarter, the S&P/NZX 50 Index returned 0.27% and recorded a gain of 9.64% over the one-year period. Utilities, industrials, and real estate sectors were among the top contributors to the quarter's performance.

While the annual inflation fell to 6.0%, compared with 7.0% in the previous quarter, it continues to be high. The Reserve Bank of Australia increased the cash rate by 25 basis points to 4.10%² at its meeting on June 7. Australian shares measured by the S&P/ASX 200 Index increased 2.53% over the June quarter, driven mainly by the financials and information technology sectors; top performers in these sectors were Commonwealth Bank of Australia (3.51%), ANZ Group Holdings Ltd. (8.56%), and Xero Ltd. (34.99%).

Important Disclosure

The conduct of Morningstar's analysts is governed by Code of Ethics/Code of Conduct Policy, Personal Security Trading Policy (or an equivalent of), and Investment Research Policy. For information regarding conflicts of interest, please visit: global.morningstar.com/equitydisclosures

1 RBNZ had held the official cash rate at 5.50% in its meeting on July 12, 2023.

2 RBA had held the cash rate target at 4.10% on its meeting on July 5.

3 On Nov. 30, 2022, Kiwi Wealth officially joined the Fisher Funds. The combined entity of Fisher and Kiwi Wealth represents the second largest manager, and this will be reflected from next quarter onward.

Meanwhile, the local REITs measured by the S&P/NZX All Real Estate Index lost 0.74% over the one-year period, however it had a gain of 3.13% over the last quarter. The Australia REITs market had a favorable performance over the June quarter, the S&P/ASX 200 A-REIT Index returned 4.95% and recorded a gain of 6.20% over a one-year period.

Fund Manager Results

All multisector KiwiSaver funds produced positive returns over the June quarter. The average multisector category returns ranged from 1.2% for the conservative category (including default options) to 5.5% for the aggressive category. Top performers over the quarter against their peer group included Kiwi Wealth³ Default Conservative fund 2.1% (multisector conservative), Generate Moderate fund 2.7% (multisector moderate), QuayStreet Socially Responsible Investment fund 4.8% (multisector balanced), QuayStreet Growth fund 6.4% (multisector growth), and Generate Focused Growth fund 7.7% (multisector aggressive).

Default options appointed in 2021 had improved results compared with the latest quarter: Simplicity Default (9.6%), Booster Default Saver (9.4%), and BNZ Default (9.4%) over the one-year period.

It is most appropriate to evaluate performance of a KiwiSaver scheme by studying its long-term returns. Over 10 years, the aggressive category average has given investors an annualized return of 8.7%, followed by growth (8.3%), balanced (6.6%), moderate (4.6%), and conservative (4.2%).

Furthermore, the Global Sustainability Rating was added to the survey, displaying funds with four and five globe ratings received. The Morningstar Sustainability Rating is designed to support investors in evaluating the relative environmental, social, and governance risks within portfolios.

Market Share

KiwiSaver assets on the Morningstar database increased during the June quarter to NZD 97.5 billion. ANZ leads the market share with more than NZD 19.6 billion. ASB is in second position, with a market share of 15.3%. BT holds the third spot ahead of Fisher Funds (in fourth), while Kiwi Wealth sits in the fifth spot. The six largest KiwiSaver providers account for approximately 68% of assets in our database.

About This Survey

This survey groups KiwiSaver options according to their mix of income and growth assets, or “asset allocation.” This is one of the most important decisions to make when saving for retirement. The term “income assets” refers to cash and fixed interest securities that generally produce stable and reliable returns but offer little opportunity for long-term capital growth. Returns from “growth assets” such as property and shares can be volatile—as recent market conditions have demonstrated—but over time have shown greater capacity for increasing in value. The mixture of income and growth assets is the major determinant of potential return and volatility.

Investors may notice differences between the returns published in this survey and those they see elsewhere. There are several possible reasons for this. First, the returns published here are after fees but before tax. Second, we take the associated tax credit into consideration when calculating and publishing these returns, while some fund managers base their published performance figures on month-end unit prices only. ■■

Morningstar KiwiSaver Report: 30 June 2023

Snapshot

Please note:

- Past performance is not a guide to future performance. This year’s best performers can easily be next year’s worst.
- Understanding your risk profile, and the mix of growth and income assets is critical.
- Fees are the one constant that will always eat away at your returns. Take a close look at the cost of your KiwiSaver Scheme.

Fee Revenue Analysis Assumptions

These figures is calculated by simply muliptying the latest size reported to us, by the latest fee reported in the PDS. Its forward looking and may vary.

These fees have not yet been collected

This fee number includes the fund managers own estimates for their performance fees from their Product Disclosure Statement, in which they actually earn significantly more or less depending on their result.

This size is only an estimate, and can be different because of the size of the fund fluctuating through the year, and performance fee estimates

You should not use this data to assume what a fund company has earned in fees from KiwiSaver.

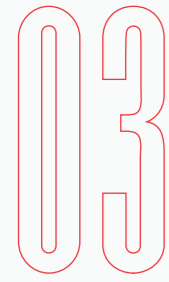

End of Year Hiostorical Size Data

This is not the historical size of the overall market

This is an aggregation of the fund and firms that exist today, and where the fund sizes were.

This does not include any firms who have existed KiwiSaver

This will treat merged firms as one

Morningstar KiwiSaver Report: 30 June 2023

Notes

Undisclosed.

* Performance numbers supplied directly from the provider rather than calculated independently by Morningstar.

** Mean rather than a Median.

Minimum fee up to \$40/50 depending on option is charged, inclusive of other costs.

No member fee for balances below \$10,000, otherwise \$30.

The Member Fee was removed effective 1 May 2019.

NZ Funds

NZ Funds have decided not to submit information to our database as of March 2020 and have been removed from the performance tables.

Estimated Fees = Fee X Latest Net Assets
