

KiwiSaver Survey

June Quarter 2020

The June quarter saw markets improve from the lows of March. The S&P/NZX50 index recorded 16.9% over the June quarter and the index is now only 0.4% down from where it started the year. The June Quarter returns of KiwiSaver funds generally reflected the improved underlying market conditions. Average multisector category returns ranged from 4.6% for the Conservative category to 13.1% for the Aggressive category.

Tim Murphy
| 30-July-20 |

Morningstar's quarterly KiwiSaver Survey is designed to help New Zealand investors assess the performance and other key characteristics of their KiwiSaver superannuation options. The accompanying tables show KiwiSaver fund returns for the one, three, five and ten years to 30 June 2020.

Market Commentary

New Zealand shares have continued to recover from their post COVID-19 low point in March. The S&P/NZX50 index recorded 16.9% over the June quarter and the index is now only 0.4% down from where it started the year. The recovery has however been concentrated on a small number of the bigger names including Fisher & Paykel Healthcare and A2 Milk: the S&P/NZX 10 index is up 7.8%, but the Mid Caps are down 14.6% and the Small Caps down 14.1%. It has been a similar story in Australia, although across the Tasman shares have had a more modest recovery from their March lows. The S&P/ASX200 index returned 16.5% over the June quarter, for the year to date, the index is still down 10.4%. Information technology stocks (up 11.7%) and consumer staples (up 2.5%) have been the pick of the sub-

sectors, and the miners have held up reasonably well with only a 1.1% loss, but the financials (down 19.8%) and the industrials (down 17.8%) have struggled.

International equities have improved from their earlier COVID-19 related sell-off, although the pace of recovery has eased off in recent weeks, with little net movement in June as investors paused to reconsider the outlook for the global economy. The gradual recovery has however not been strong enough to make back all the ground lost earlier, and for the year to date the MSCI World index of developed sharemarkets in U.S. dollars is still down 5.8%. New Zealand investors experienced only a small loss in New Zealand dollar terms, due to the 4.6% depreciation of the kiwi dollar against the U.S. dollar. The developed markets' performance has owed a lot to the strong U.S. market, the S&P 500 returned 20.5% for the quarter and is down by a relatively modest 3.1% for the year, while the tech-oriented Nasdaq index is up 30.9% for the quarter and well ahead for the year, with a 12.7% gain.

The S&P/NZX All Real Estate index has been one of the weaker areas of the New Zealand market. The index lagged the broader

market to be up only 6.7% during the June quarter. The S&P/ASX 200 REITs Index rose 19.9% over June but was unable to claw back heavy losses from the previous quarter, year to date the index is down 21.3%

Short-term interest rates have remained very low as the Reserve Bank of New Zealand has kept the official cash rate at 0.25%.

Long-term yields have risen from their low point in mid-May, when the 10-year government bond yield got as low as 0.5%. At its current 1.0% the 10-year yield is well down from where it started the year (1.65%). The S&P/NZX government bond index returned 2.3% over the June quarter and 5.8% year to date.

Quarterly Fund Manager Results

The June quarter returns of KiwiSaver funds generally reflected the improved underlying market conditions. Funds with a large exposure to US growth stocks or overweights to A2 Milk and Fisher & Paykel Healthcare in their NZ equity exposure are likely to have performed particularly well. The Average multisector category returns ranged from 4.6% for the Conservative category to 13.1% for the Aggressive category. Top performers over the quarter against their peer group includes **Kiwi Wealth**

KiwiSaver Scheme Conservative 7.0% (Multisector Conservative), **Aon KiwiSaver Russell Lifepoints Moderate** 8.3% (Multisector Moderate), **SuperLife KiwiSaver Growth** 11.6% (Multisector Balanced), **AMP KiwiSaver Nikko AM Growth** 14.8% (Multisector Growth), and **Booster KiwiSaver Geared Growth** 19.9% (Multisector Aggressive). Average annual returns for multisector options ranged from 4.6% down to 3.3%. The Aggressive category average recorded 4.6% for the year, followed by Conservative (4.5%), Moderate (3.7%), Balanced (3.6%), and Growth (3.3%).

It is most appropriate to evaluate performance of a KiwiSaver scheme by studying its long-term returns. Over 10 years, the Growth category average has given investors an annualised return of 9.6%, followed by Aggressive (9.0%), Balanced (8.1%), Moderate (6.5%), and Conservative (6.0%).

Market Share

KiwiSaver assets on the Morningstar database have recovered from their March lows and sit at NZ\$66.5 billion as at 30 June 2020 up from NZ\$63.1 billion at 31 December 2019. ANZ leads the market share with more than NZ\$15.5 billion. ASB is in second position, with a market share of 18.2%. Westpac holds third spot ahead of AMP, while Fisher Funds sits in fifth spot. The six largest KiwiSaver providers account for approximately 79% of assets on our database.

About This Survey

This survey groups KiwiSaver options according to their mix of income and growth assets, or "asset allocation". This is one of the most important decisions to make when saving for retirement. The term "income assets" refers to cash and fixed interest securities that generally produce stable and reliable returns but offer little opportunity for long-term capital growth. Returns from "growth assets" such as property and shares will be erratic – as recent market volatility has demonstrated – but over time have shown greater capacity for increasing in value. The mixture of income and growth assets is the major determinant of potential return and volatility.

Investors may notice differences between the returns published in this survey and those they see elsewhere. There are several possible reasons for this. First, the returns published here are after fees but before tax. Second, we take the associated tax credit into consideration when calculating and publishing these returns, while some fund managers base their published performance figures on month-end unit prices only. ■■■

Morningstar KiwiSaver Report: 30 June 2020

Please note:

- Past performance is not a guide to future performance. This year's best performers can easily be next year's worst.
- Understanding your risk profile, and the mix of growth and income assets is critical.
- Fees are the one constant that will always eat away at your returns. Take a close look at the cost of your KiwiSaver Scheme.

Performance and Fee Notes

Und. = Undisclosed.

* Performance numbers supplied directly from the provider rather than calculated independently by Morningstar.

** Median rather than a mean.

Minimum fee up to \$40/50 depending on option is charged, inclusive of other costs.

No member fee for balances below \$10,000, otherwise \$30.

The Member Fee was removed effective 1 May 2019.

JUNO KiwiSaver Funds

Juno charges a flat dollar fee based on balance, so it is not possible to incorporate a percentage fee accurate for all members in the funds after tax return.

Morningstar has adopted its global policy for dollar-based fees, to the JUNO funds in this instance.

We have chosen a conservative KiwiSaver balance, of \$10k, and applied the JUNO fee for that balance (\$60) to get 0.60%.

We have deducted that from the return we generate using its unit prices, which are pre fee.

This percentage impact to each member is likely to be higher, or lower, than this figure. Please refer to the PDS for its fee schedule.

NZ Funds

NZ Funds have decided not to submit information to our database as of March 2020 and have been removed from the performance tables.
