

KiwiSaver Survey

December Quarter 2020

Strong returns across the board as KiwiSaver industry surpasses NZ\$76 billion.

Tim Murphy
| 27-Jan-21 |

Morningstar's quarterly KiwiSaver Survey is designed to help New Zealand investors assess the performance and other key characteristics of their KiwiSaver superannuation options. The accompanying tables show KiwiSaver fund returns for the three months, one, three, five and ten years to 31 December 2020.

Market Commentary

Looking back on the investment year just past, given the economic downturn, loss of jobs and uncertainty resulting from the COVID-19 pandemic, most would agree that it had turned out better than expected, with the final quarter of 2020 performing particularly well. The strong finish to the year may be attributed to the continued progress in the distribution of vaccines and further monetary and fiscal support from policy makers. The S&P/NZX50 index recorded a gain of 11.4% over the December quarter. The strong performance of utility stocks such as Meridian Energy, Infratil and Contact Energy contributed to performance as did Health Care stocks including Pacific Edge and Summerset Group. Small Caps made significant ground over the last quarter with a return of 21.7%, while the S&P/NZX 10 recorded 11.2%. Australian shares as measured by the S&P/ASX

200 Index performed strongly over the last quarter of 2020 returning 13.7%. The strong December quarter performance was driven mainly by gains made in November (10.2%). Performance was dampened towards the end of the year as trade tensions with China worsened and local rates of COVID-19 infections increased. The Australian market managed to produce a return of 1.2% in the final month of the year. Over the quarter the energy sector (26.1%) was the best performing sector followed by financials (22.8%), and a handful of strongly performing names helped information technology (22.7%) do well. The more defensive sectors struggled over the quarter, including Utilities (-5.4%), and Health Care (-1.0%).

International shares rose in aggregate over the December quarter as confidence in a vaccine led recovery over 2021 grew. The MSCI World Index was up 13.9% in US dollars, the rise in the New Zealand dollar dampened gains for unhedged investors as the index rose 4.6% in NZD. All of the underlying sectors made gains over the three months to December, energy rose the most while consumer staples was the laggard. The U.S. market had a strong quarter with the S&P/500 up 12.1% and the tech-oriented Nasdaq index recorded a double-digit quarter of 13.1%. Elsewhere, European stocks rallied as the arrival of effective

vaccines overshadowed a wave of a new strain of COVID-19. Japan also made gains with the Nikkei 225 Index up over 18.5%.

The S&P/NZX All Real Estate index returned 8.5% over the quarter, while the S&P/ASX 200 A-REIT Index returned 13.3%, narrowly trailing the broader S&P/ASX 200 Index.

Short-term interest rates have continued to offer very low returns reflecting the Reserve Bank of New Zealand's maintenance of the official cash rate at 0.25%, the 90-day bank bill yield ended the year at 0.27%. The 10-year New Zealand Government bond yield climbed to 0.99% from a low of 0.52% at the start of the quarter. The S&P/NZX government bond index returned -2.8% over the December quarter.

Fund Manager Results

KiwiSaver funds generally reflected the strong underlying market conditions experienced over the December quarter. The average multisector category returns ranged from 2.0% for the Conservative category to 8.8% for the Aggressive category. Top performers over the quarter against their peer group includes **Milford Conservative** 3.1% (Multisector Conservative), **Aon Russell Lifepoints Moderate** 4.9% (Multisector Moderate), **CareSaver Balanced** 8.1% (Multisector Balanced), **JUNO KiwiSaver Growth** 11.0% (Multisector Growth), and **SuperLife High Growth** 12.3% (Multisector Aggressive). Average annual returns for multisector options ranged from 11.3% down to 6.1%. The Aggressive category average recorded 11.3% for the year, followed by Growth (10.7%), Balanced (8.8%), Moderate (6.8%), and Conservative (6.1%).

It is most appropriate to evaluate performance of a KiwiSaver scheme by studying its long-term returns. Over 10 years, the Growth category average has given investors an annualised return of 9.9%, followed by Aggressive (9.5%), Balanced (8.3%), Moderate (6.6%), and Conservative (6.1%).

Market Share

KiwiSaver assets on the Morningstar database sit at more than NZ\$76.3 billion as at 31 December 2020 up from NZ\$63.3 billion at 31 December 2019. ANZ leads the market share with more than NZ\$17.5 billion. ASB is in second position, with a market share of 17.5%. Westpac holds third spot ahead of Fisher Funds, while AMP sits in fifth spot. The six largest KiwiSaver providers account for approximately 76% of assets on our database.

About This Survey

This survey groups KiwiSaver options according to their mix of income and growth assets, or "asset allocation". This is one of the most important decisions to make when saving for retirement. The term "income assets" refers to cash and fixed interest securities that generally produce stable and reliable returns but offer little opportunity for long-term capital growth. Returns from "growth assets" such as property and shares will be erratic – as recent market volatility has demonstrated – but over time have shown greater capacity for increasing in value. The mixture of income and growth assets is the major determinant of potential return and volatility.

Investors may notice differences between the returns published in this survey and those they see elsewhere. There are several possible reasons for this. First, the returns published here are after fees but before tax. Second, we take the associated tax credit into consideration when calculating and publishing these returns, while some fund managers base their published performance figures on month-end unit prices only. ■■

Morningstar KiwiSaver Report: 31 December 2020

Please note:

- Past performance is not a guide to future performance. This year's best performers can easily be next year's worst.
- Understanding your risk profile, and the mix of growth and income assets is critical.
- Fees are the one constant that will always eat away at your returns. Take a close look at the cost of your KiwiSaver Scheme.

Performance and Fee Notes

Und. = Undisclosed.

* Performance numbers supplied directly from the provider rather than calculated independently by Morningstar.

** Median rather than a mean.

Minimum fee up to \$40/50 depending on option is charged, inclusive of other costs.

No member fee for balances below \$10,000, otherwise \$30.

The Member Fee was removed effective 1 May 2019.

JUNO KiwiSaver Funds

Juno charges a flat dollar fee based on balance, so it is not possible to incorporate a percentage fee accurate for all members in the funds after tax return.

Morningstar has adopted its global policy for dollar-based fees, to the JUNO funds in this instance.

We have chosen a conservative KiwiSaver balance, of \$10k, and applied the JUNO fee for that balance (\$60) to get 0.60%.

We have deducted that from the return we generate using its unit prices, which are pre fee.

This percentage impact to each member is likely to be higher, or lower, than this figure. Please refer to the PDS for its fee schedule.

NZ Funds

NZ Funds have decided not to submit information to our database as of March 2020 and have been removed from the performance tables.
